**GSL**

_General Systems Labs.

"We are a software R&D startup based in kumasi, with a keen focus on the development of industry-grade software and logistics for various applications"

Leslie Owusu Mensah , CEO

"Our field of expertise range from encrypted communications networks for companies , Generative and Predictive Ai Models, Industry Management Softwares And Robotics."

Samuel Abbey Desmond , CTO

Some of our ongoing R&D projects

Mantle Sight

Ai-powered mineral prospecting algorithm , that runs on convergent-generative prediction model to locate metallic mineral deposits within the earth crust.

Mach Link

Industry scale private decentralized email service with prime focus on protecting company messages and preventing cyber security risks such as phishing attacks.
